

Position: Machine Learning Intern
Company: Ksolves India Limited

We are looking for a passionate Machine Learning Intern to join our team. You will work on real-world AI/ML problems, building models and delivering insights.

Responsibilities:

- Preprocess data using Python, pandas, NumPy
- Build and evaluate machine learning models using Scikit-learn
- Work with NLP tools like spaCy or NLTK
- Implement vectorization techniques (TF-IDF, Word2Vec)
- Analyze text data and apply semantic similarity methods
- Collaborate using Git and participate in Agile development

Required Skills:

- Python programming
- Machine Learning (Scikit-learn)
- Natural Language Processing (spaCy, NLTK)
- Data manipulation (pandas, NumPy)
- Version control (Git)
- Communication and teamwork

Nice to Have:

- Knowledge of Deep Learning (TensorFlow, PyTorch)
- Experience with Streamlit or Flask
- Familiarity with cloud platforms (AWS, GCP)

Duration: 3–6 months

Location: Remote

Stipend: Performance-based
